Microsoft Intune

Master Class (2 Days in German)

Time: 9 am - 5 pm

Location: FFHS Gleisarena, Zollstrasse 17, 8005 Zürich

Microsoft Intune is a cloud-based service that focuses on mobile device management (MDM) and mobile application management (MAM). You control how your organisation's devices, including mobile phones, tablets and laptops, are used. You can also configure specific application control policies. On personal devices, Intune helps ensure your organisation's data stays protected and can isolate organisational data from personal data.

Microsoft Intune is part of Microsoft Enterprise Mobility + Security (EMS) Suite. Intune integrates with Azure Active Directory (Azure AD) to control who has access and what they can access. It can be used with the Microsoft 365 product suite. This feature allows employees in your organisation to be productive on all their devices while protecting your organisation's information with the policies you create.

Key data

Target group:	Microsoft Intune Administrators (max. 12 participants)
Price:	CHF 2'200 (incl. training documentation & lunch)
